

Overcome the Obstacles

Design an obstacle course for the younger students at your school.

Think About...

- **Who** you're making this course for and their capabilities and limitations.
- **What** equipment and space you have available.
- **How** you're going to manage the risks so no one gets harmed.

Make it **challenging**
and something that
will **test** all their skills, and at
the same time
something they can
OVERCOME!
